

Tofu Manual Cutting Equipment – TMC

- **Application**

The Tofu Manual Cutting Equipment (TMC) is designed to cut in two directions on a tofu slab to obtain product portions of homogeneous dimensions.

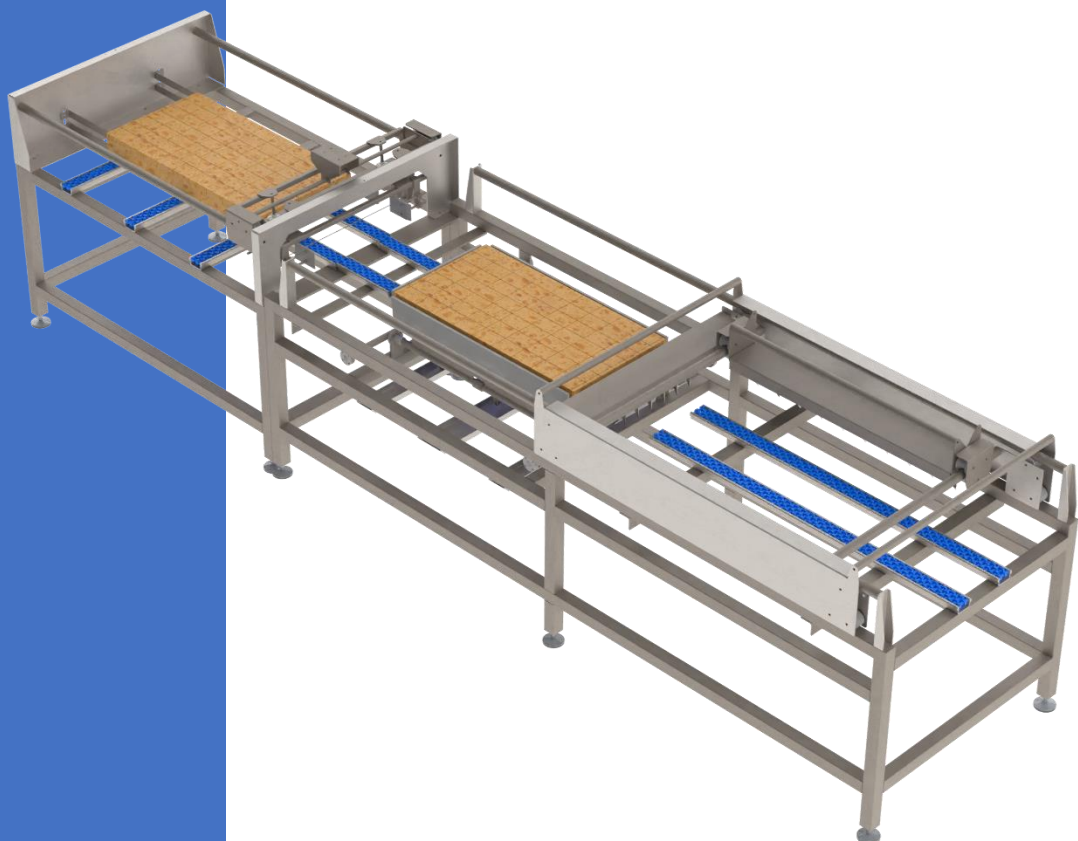

The manual push handles cut the tofu by blades in horizontal and vertical direction respectively. The operator only has to push both handles to complete the operation.

The manual tofu slicer minimises operating time, minimises the risk of contamination and increases the accuracy of the finished product.

- **Design and features**

The Tofu Manual Cutting Equipment is made of stainless steel, quality AISI316, in the parts in contact with the product.

The tofu slabs move on roller guides.

- **Technical specifications**

Materials:

Parts in contact with the product Sainless steel AISI 316L

Other steel parts Sainless steel AISI 304L

Surface finish:

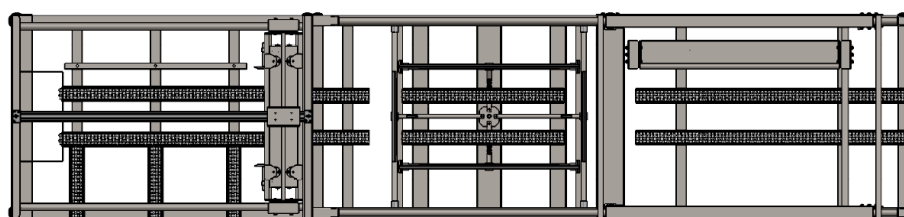

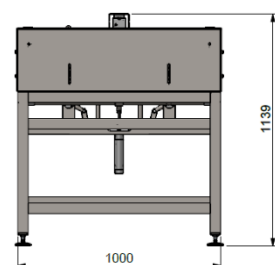

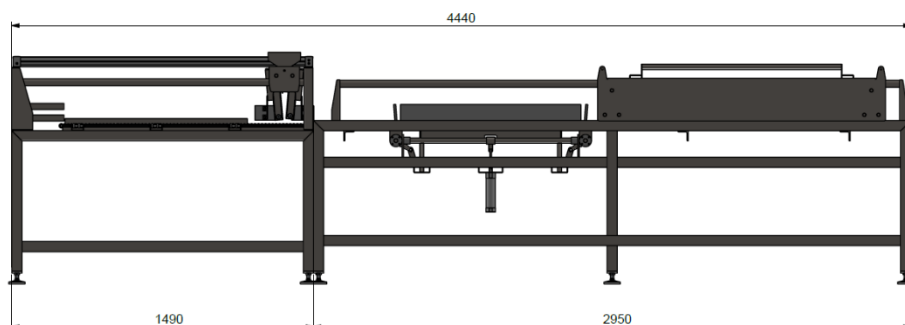

Internal 2B, with welds removed and polished

External Matt
